## PROGRAM OVERVIEW

# Autodesk® Certified User

Career and technical education programs across the United States equip students with marketable 2D and 3D design skills by teaching them to use state-of-the-art Autodesk® design software. Autodesk Certified User (ACU) certification confirms students have the skills necessary to continue their design careers—whether they attend college, enter the workforce or work toward additional levels of industry certification after graduation.

### Fulfill Academic and Industry Requirements

AutoCAD® Certified User and Autodesk Inventor® Certified User certifications include both academic and industry requirements in attainable certifications designed specifically for students. The exams combine multiple-choice and performance-based questions to ensure students understand and can effectively use Autodesk software.

### Validate Student Skills and Abilities

Autodesk Certified User certificates enhance student college applications and resumés, providing evidence of competency and proficiency. Earning User-level certifications while in school gives students confidence as they continue to master Autodesk products and pursue Associate and Professional-level certifications in the future.

### Hands-On Learning Meets On-Site Certification

The Autodesk Education Community offers students and educators free software, learning materials and classroom support—giving them experience with the same design software that professionals use every day. By partnering with Certiport, the leading provider of industry certification exams, schools become Certiport® Centers, provide Autodesk certification exams in their classrooms and certify student design software skills with recognized, industry certifications.

### Simple, Affordable Testing Options

Certiport Centers have access to practice tests, certification exams and other resources they need to ensure students are prepared to take exams and successfully earn certifications. Classroom license options allow schools to conduct unlimited online testing for an affordable annual fee that simplifies budgeting by eliminating per-test costs.

**Sign-up to become a Certiport Center by contacting your Certiport Solution Provider or visiting [www.certiport.com/go](http://www.certiport.com/go).**

**Learn more about Autodesk certification and register your school as a Certiport Center today. Contact your Certiport Solution provider or visit [www.certiport.com/autodesk](http://www.certiport.com/autodesk) for more information.**

### Download Free Software

Students and educators can download a student version of Autodesk software for personal use. To learn more visit the Autodesk Education Community at <http://students.autodesk.com>.

### Download Exam Skills

Designed to help educators and educational institutions teach Autodesk software skills and set forth important skill standards for developing a high-quality user certification exam and curriculum resources. Download at [www.certiport.com/autodesk](http://www.certiport.com/autodesk).
