IC³ Certification Learning and Test Preparation Software Introduced by Certiport

New IC³ Certiprep developed to enhance exam experience and assess key computer skills in terms of certification objectives

SALT LAKE CITY— August 3, 2010

Certiport (www.certiport.com), the leading certification solution provider for the global workforce and academic markets, today announced the availability of Certiprep™ for the [Certiport Internet and Computing Core Certification (IC³®)](), a global standard that indicates an individual's ability to succeed in environments that require the use of computers and the Internet.

The new performance-based certification preparation software offers a comprehensive exam experience providing students and job-seekers with the practice solution needed to best prepare candidates for the testing experience, an integral step on the pathway to certification.

Details about IC³ Certiprep:
www.certiport.com/ic3practicetests

"We developed Certiprep for IC³ as part of our overall dedication to ensure that when candidates take the exam, they have had access to the resources that help prepare them for their certification experience," said [Quinn Sutton](), Senior Vice President, Certiport. "Certiprep also provides students with valuable feedback to identify their weaknesses and help them improve on specific areas of the exam. By offering this preparation software, we are showing our commitment to a student's certification success."

The IC³ Certiprep includes a large question library for the three exam modules—Key Applications, Living Online, and Computing Fundamentals. Computing Fundamentals tests the foundational knowledge of computers and computing technology. Key Applications covers word processing, spreadsheet and presentation applications and the common features of all applications. Living Online addresses the skills for working in an Internet or networked environment.

The preparation software incorporates a practice test mode to simulate an IC³ exam and a learning mode allowing students to review questions in the database, without a time limit, and assess certification exam preparedness.

"Candidates who take the practice tests go into the actual exam feeling more comfortable and confident because they have received a practical sense of the exams," Sutton added. "This not only helps them get through the exam, but also enables them to feel competent to succeed in the job market as the exam has laid special emphasis on practical aspects of relevant technology skills utilized in the workplace."

Certiport is the exclusive solution provider of the IC³ program utilizing an expansive network of more than 10,000 Certiport Authorized Testing Centers (CATC) in 142 countries worldwide. The latest version, Global Standard 3, is an internationally recognized standard for digital literacy. The IC³ Certiprep offering allows Certiport to support the entire certification lifecycle including study materials, practice exams and certification.

IC³ Certiprep is available in 12 languages, provided as a download or on a CD. The software is available in single, 10, 30 or 60-seat annual licenses. For more information call 1-800-488-9371 or email [ic3info@certiport.com]().
