GIVE YOUR BUSINESS A CLEAR ADVANTAGE

FOCUS YOUR INTERNET SKILLS.

SHARPEN YOUR DIGITAL LITERACY.

CLARIFY THE VALUE OF YOUR ORGANIZATION.

"IC³ is the first stepping stone into the certification path. It is a fundamental tool for measuring proficiency in the latest key technologies for work and life."

"There is a generalized attitude that secretaries are the only group that benefit from certification. However, they are not the only staff within an organization using a computer. All may not be required to be efficient in Microsoft, but the majority are exposed to computers on a daily basis and everyone needs the skills to make sure they are not left behind."

CERTIPORT®

In a world focused on computers, one certification can give your business a clear advantage: The Internet and Computing Core Certification (IC³). This globally recognized certification can ensure that your employees have the foundation of knowledge needed to excel in areas that involve computers and the Internet.

The IC³ Global Standard 3 reflects the most relevant skills for business today, including: Computing Fundamentals, Key Applications, and Living Online. With IC³ Certification, your employees have the critical entry-level skills needed to effectively use the latest computer and Internet technology to achieve business objectives, expand productivity, improve profitability, and give your company a competitive edge.

Living Online

Covers skills for working in an Internet or networked environment.

Key Applications

Covers popular word processing, spreadsheet and presentation applications and the common functions of all applications.

Computing Fundamentals

Covers a foundational understanding of computing.

Exams make use of the latest testing technologies, including the integration of both performance-based and knowledge-based testing.

"The majority of individuals don't truly know the basics - such as how a computer is put together. Most know bits and pieces, but these exams empower employees with in-depth knowledge and proficient skills required in the workplace."

BENEFITS TO TRAINERS.

Based on the current thinking and best practices in technology education, the IC[3] Certification program equips trainers with a proven, state-of-the-art program that offers several advantages, including:

- Data-driven decision making through relevant reporting.
- Unbiased examination through psychometrically validated certification exams.
- Universal portability and relevance as a recognized global standard in digital literacy.
- Ready solution that is more cost effective and time efficient than creating your own.
- A professional development tool that boosts trainer confidence to integrate technology in the classroom.

BENEFITS TO EMPLOYEES.

By helping you focus and validate your employees' skills in the critical areas of computer technology and the Internet, IC[3] Certification gives your employees and your business many advantages, including:

- Strong foundation of skills on which to continue their education and training.
- Fundamental skills with immediate job application.
- Valuable edge in today's competitive business environment.
- Validation of skills and talents job assignment and advancement.
- Demonstrated qualification in emerging fields.
- Accelerated success and shorter learning curve in areas involving computers and Internet.
