A. The IC³ Global Standard 4, GS4, is the most recent IC³ digital literacy standard.

Q. Why did Certiport create the IC³ GS4 standard?
A. Technology is always changing, therefore it is critical that world's fastest growing digital literacy program, IC³, keep up-to-date. The IC³ GS4 was developed to align the IC³ standard to the most current and relevant digital literacy requirements. With IC³ GS4, teachers and students can have confidence that their IC³ certification measures the technology and skills that are relevant today.

Q. What changes can I anticipate with the IC³ GS4 exams?
A. IC³ GS4 also addresses the newest concepts in digital literacy, such as social media, collaboration, digital devices, research fluency, cloud computing, and critical thinking to the certification. Like previous IC³ standards, IC³ GS4 aligns to the ISTE NETS-S standard and is also approved by the American Council on Education (ACE).

Q. Which operating system and Microsoft Office product versions are used with the IC³ GS4 exams?
A. The IC³ GS4 exams align to Microsoft Office 2010 and Windows 7.

Q. How can I take the IC³ GS4 exams?

Q. I'm already IC³ certified. Can I also take the IC³ GS4 exams?

A. Absolutely. We encourage everyone who wants to stay up-to-date on their technology skills to become IC³ GS4 certified. We especially encourage teachers and IC³ instructors to take the IC³ GS4 exams to ensure that they are aware of changes that have occurred within the standard.
